RPS Energy – Risk and Environmental Management

RPS is an international consultancy providing advice on the development of natural resources, land and property, the management of the environment and the health and safety of people. RPS Energy helps clients develop natural energy resources across the complete asset cycle, combining our technical and commercial skills with an in-depth knowledge of environmental issues.

RPS has a respected capability with a track-record of successful delivery within many organisations and government departments. We are embarking on a programme of further expansion in this sector and are now seeking the right individual to support this expansion.

We are a well-established consultancy and specialise in providing worldwide Health, Safety and Environmental (HSE) support to a wide range of industry sectors including: Petroleum exploration and production operations (on and offshore); Oil, gas and gas liquids processing, Project construction and decommissioning; Power generation; Refining and chemicals;

As a result of our continuing growth we have the below vacancy within our London offices.

Job Title: Consultant (Contingency Planning)

Based in the City of London

Requirements:

- 5 yrs + incident management experience - preferably at Silver/Gold level or equivalent
- Proven ability to develop incident management/contingency plans
- Planned, developed and directed multi-level Emergency/incident exercises
- Ability to work with (and critique) clients at all levels from Board to site – i.e. diplomatic
- Operational and tactical response experience (Oil & gas, military, Police, Firefighting, etc)
- Relevant degree or substantial equivalent experience
- Experience of designing and delivering training all levels of an organisation
- Able to travel internationally, sometimes at short notice
- Proven ability to work in teams but able to self-motivate
- Project management
- Understanding and experience in conducting risk assessments
- Proficient in MS Office particularly Word, Excel, Visio and Powerpoint
- Able to be on call and within 2 hrs travelling time to London

Advantageous experience for the role:

- Oil spill management experience – use of equipment, OPEP/OSCP's, shoreline protection
- Oil & gas operations experience
- Working knowledge of oil & gas HSE legislation
- Working knowledge of ICS
- Training, Line Management and Consultancy experience
- Security assessment and planning

Interview requirements:

- Short (max 10 minutes plus 5 minutes questions) MS Powerpoint presentation (using own experiences) on either:
 - Emergency or incident management from a strategic (corporate) level
 - Media management in a significant emergency or incident
